

The most advanced attack surface management platform on the market.

Discover and manage external digital business risks with unmatched precision.

Attack surface management panel displays assets and related risks including Overall Risk Score, Asset Landscape, and Active Assets.

Graphs and analytic tools present attack surface risk and exposure summaries including trends and asset risk reports.

Orbit's dashboard provides a complete, at-a-glance view of the attack surface, risk assessment, and asset summary with options for detailed information and insight.

Risk prioritization panel addresses vulnerabilities for mitigation including Top Riskiest Assets, Insights, and Highlighted Vulnerabilities.

Key Benefits

- ✳ Consolidate technologies to simplify operations and reduce costs.
- ✳ Improve agility and efficiency to eliminate more risks.
- ✳ Gain visibility of unknown threats as they emerge.
- ✳ Continuously discover new assets and vulnerabilities.
- ✳ Assess risks to determine compromise blast radius.

How It Works

- ✳ Pure Signal™ Orbit scans the entire attack surface including IP addresses, top-level domains, and subdomains.
- ✳ Proprietary algorithms continuously and automatically scan all discovered assets and generate risk scores.
- ✳ An intuitive dashboard presents visualized, real-time metrics and reports for analysis and action.

Start a 30-Day Free Trial

Tiered Licensing

Meets customer needs and budgets.

Autonomous Onboarding

Start with a single IP or top-level domain and Orbit does it for you.

Reduce Management Overhead

Integrate into workflows to streamline operations.

"I'm amazed at how Pure Signal Orbit is consistently able to discover on average 50% or more assets than any other ASM solution in the market today. With some clients seeing up to 500%. This showcases the true power of Pure Signal from Team Cymru."

Brad LaPorte,
Gartner Veteran

Discover all your assets and eliminate blind spots

Unrivaled discovery capability reveals up to 50% more assets compared to other attack surface management platforms.

Measure and monitor risk with intuitive tools and reporting

Align your team to your IT and corporate goals and gain insights into risk management performance.

Experience unmatched scanning speeds and outcomes

Leverage the highest vulnerability scanning rate in the industry to prioritize risk, reduce weakness, and enhance team effectiveness.

Asset-specific threat intelligence reveals organizational impacts

Our uniquely integrated threat intelligence reveals breaches and compromises in near real-time (NRT).

Automated scanning improves visibility

Continuous scans support proactive external asset discovery and monitoring to address exposures before they become threats.

Contextual threat intelligence enriches exposed landscape

Categorize assets by shared hosts, bots, controllers, residential IPs, and more to enhance threat visibility and analyze activity between threat actor infrastructure and your organizational edge.

Key Features

- ✳ Asset inventory and management
- ✳ Business risk monitoring
- ✳ API with online schema tester
- ✳ Vulnerabilities scanning
- ✳ CloudApps classification
- ✳ Integrations for ServiceNow
- ✳ Integrated threat intelligence

Team Cymru's mission is to save and improve human lives by working with security teams around the world to track and disrupt the most sophisticated bad actors and malevolent infrastructures. Powered by the Pure Signal™ platform, the largest source of context-enriched threat intelligence, it provides Enterprise and Government customers with real-time visibility of security gaps and malicious internet activity beyond network borders to proactively close detection gaps and accelerate incident response across organizations and third-party ecosystems. Its Community Services provides no-cost threat detection, alerting, DDoS mitigation, and threat intelligence to more than 140 CSIRT teams across 86+ countries.
