TEAM CYMRU™

PURE SIGNAL™
RECON

External Threat Intelligence for experienced Cyber Threat Analysts

Teams that proactively analyze external threat intelligence add strategic value.

"We found great utility in being able to preemptively stop an attack with visibility into changes that threat actors were making to their infrastructure in an effort to attack us again."

Threat Intelligence Manager, UK Retail Bank

Make Discoveries Beyond Your Borders

Gain insights on threat actor infrastructure other tools can't match.
With direct access to Pure Signal, the world's largest threat and risk IP intelligence data ocean, your team has no boundaries and threat actors have nowhere to hide.

300bn+
daily communications curated into queryable data.

External visibility
extends the reach of SOCs, threat and fraud teams to internet scale

Proactively monitor
active threats that impact your own and third-party infrastructure.

Enhance defenses
with real-time insights on where attackers will strike from next.

Add Value Across the Entire CTI Process

Speed up cyber investigations, incident response and ensure breach recovery has longer lasting impact.
Empower the teams involved in Incident Response and Recovery, assist in Third Party Risk, and reveal precisely where threats and risks originate to make defensive measures more effective.

One Platform for Multiple Use Cases

Access to the largest IP intelligence data ocean in the world expands your team's capabilities.
- ☑ Tracking APTs that target your organization
- ☑ Monitor for signals of Ransomware and Data Breach
- ☑ Assess risks across your third parties, M&A, and Supply Chain
- ☑ DDoS Attack Mitigation
- ☑ Brand Protection

External Visibility
extends the reach of SOCs, Cyber Threat Investigation, Defense and Intelligence teams to internet scale.

Optimized for budgets
of all sizes, with pricing based on users and specific requirements.

About Team Cymru
Our mission is to save and improve human lives.

We are unrivalled across three disciplines: digital business risk platforms, free-to-use community services, and support services to over 143 Government CSIRT teams.

Our business risk and threat intelligence platforms empower global organizations with unmatched Threat Reconnaissance and Attack Surface Management capabilities to meet the challenges of today's cyber threats. www.team-cymru.com
